

Environment Policy

We fully accept our responsibility to the environment and recognise that environment responsibility is integral to producing world class products. In manufacturing operations, adverse effects on the community, environment and natural resources are to be minimised while safeguarding the health and safety of our employees, the public and the communities we operate in. We utilise management systems within the business such as the CCLL Global Ethics Policy, ISO14001 standards and EICC (Electronic Industry Citizenship Coalition) guidelines to support our operations implementation and measurement of the effectiveness in meeting our commitments. The site aims cover:

- Compliance obligations;
- Protection of the Environment;
- Environmental Permits and Reporting;
- Pollution Prevention and Resource Reduction;
- Hazardous Substances;
- Wastewater and Solid Waste;
- Air Emissions;
- Product Content Restrictions.

We will ensure that employees are provided with information, instruction and training as is necessary to enable them to perform their activities in support of this policy.

Every colleague must co-operate to enable us to comply with all relevant statutory duties.

We will set targeted objectives and monitor our performance against the stated goals, with all areas fully engaging to ensure delivery and continual improvement throughout the overall business.

This policy, objectives and targets will be regularly monitored and will be reviewed annually via a formal management review.

A handwritten signature in black ink, appearing to read 'Lex Kellet', is positioned above the printed name.
